

The Richard L. Conolly College of Liberal Arts and Sciences
Invites the LIU Brooklyn Campus Community to:

A Faculty Forum Presentation

Designing the Outcomes-Based Syllabus

**Wednesday, November 11, 2009
1-2:30 p.m., LLC-515**

**Presenters: Melissa Antinori (English), Carole Griffiths (Biology),
Timothy Leslie (Biology)**

Most of us know what we want our students to learn in any particular course. We may not, however, always articulate and communicate those goals effectively to our students. An effective method for addressing both these tasks is the outcomes-based syllabus.

An outcomes-based syllabus incorporates goals and expected outcomes for students and methods for assessing those outcomes. Outcomes-based syllabi are not only helpful to faculty and but also are crucial to preparing for Middle States evaluation.

Please join us for this forum, where we will discuss our syllabi—both the problems we faced in creating them and the benefits we and our students derived from the clear articulation of our expected course outcomes.

Refreshments will be served
